

## Data sheet

Version: 08.02.2022

### Stiefel Alu Spray

For wound protection  
Skin protection aluminium spray

#### Quality care for horses

Stiefel Alu Spray can be used to protect wounds. Due to the fine aluminum particles Stiefel Alu Spray forms a breathable protective layer that can protect the wound from harmful bacteria or contamination. The wound remains clean, but still receives enough oxygen to promote wound healing.

#### Composition

Aluminium micro-particles; Solvent; Propellant

#### Application

Shake the Stiefel Alu Spray well before use to homogenise the content of the can with the help of the ball agitator, especially after long storage. Apply evenly from a distance of 20 - 30 cm until an even film has formed. If the film loses its density after 1-2 days (e.g., due touch or weather), the process can be repeated as required. For nervously reacting animals, the can should be shaken outside the hearing range of the animals, and the spraying should be started gently.

#### Hazard note:

Extremely flammable aerosol. The container is under pressure: May burst when heated. Causes serious eye irritation. May cause drowsiness and dizziness. Keep away from heat, hot surfaces, sparks, open flames and other sources of ignition. Do not smoke while using it. Do not spray on an open flame or any other source of ignition. Do not pierce or burn, even after use. Wear protective gloves/protective clothing/eye protection/face protection.

IN CASE OF CONTACT WITH THE EYES: Rinse cautiously with water for several minutes. Remove any contact lenses. Continue rinsing. For persistent eye irritation: Get medical advice/attention.

Protect from sun irradiation and do not expose to temperatures above 50°C. Repeated exposure may cause skin dryness or cracking. In the case of insufficient ventilation and/or by application, explosive/easily flammable mixtures are possible. Contains: 2-propanone; 2-propanol; Ethyl acetate.

#### Storage note:

Only for external use. Store care products in a cool and dry place protected from direct sunlight. Store out of reach of children. Store the can between 15°C and 25°C. Bring overcooled cans carefully back to room temperature.

#### Packaging:
