Stiefel Electrolyte

Rapid regeneration

For compensation of electrolyte loss

Dietetic feed for horses

Stiefel Electrolyte is a water-soluble, dietetic supplementary feed to compensate for electrolyte loss in horses due to excessive sweating, high temperature or diarrhea. Stiefel Electrolyte is also used for the stabilization of the water- and electrolyte balance of foals and older horses.

Composition

Dextrose; Sodium chloride; Potassium chloride; Magnesium acetate

Additives per KG

Nutritional additives:

Vitamin C of ascorbic acid (3a300) 1,000 mg

Analytical components

Crude protein 0.00 %; Crude fat 0.00 %; Crude fibre 0.00 %; Crude ash 51.90 %; Sodium 13.30 %; Magnesium 1.00 %; Calcium 1.00 %; Potassium 6.50 %; Chlorine 26.60 %

Feeding recommendation

To compensate for electrolyte losses in the event of excessive sweating:

Large horses (600 kg body weight) 50 - 100 g / day

Small horses 30 - 60 g / day

(1 heaped measuring spoon = approx. 20 g)

Recommended feeding duration: 1 – 3 days. Offer water for ad-libitum uptake.

For stabilization of the water and electrolyte balance and when at risk of or experiencing digestive problems (diarrhea):

Foals 50 g - 100 g / day

Recommended feeding duration: 1-7 days (1-3 days for sole feed).

It is recommended to consult a veterinarian before feeding the additive.

Storage note

Store the feed in a cool and dry place protected from direct sunlight. Use soon after opening. Store out of reach of children.

ADMR: ADMR compliant according to FN (version from: 28.06.21)
