### Stiefel Electrolyte Liquid

Rapid regeneration

For compensation of electrolyte loss

#### Supplementary feed for horses

Stiefel Electrolyte Liquid can be used to compensate for electrolyte losses and to stabilize the water and electrolyte balance. Profuse sweating, high temperatures or diarrhea can cause the loss of large amounts of electrolytes, which, due to the lack of a storage facility in the body, have to be replenished with food. Stiefel Electrolyte Liquid is suitable for sport horses as well as foals and old horses.

#### Composition

Sodium chloride; Potassium chloride; Dextrose; Magnesium chloride

#### Additives per KG

##### Nutritional additives:

Vitamin B2 (3a826) 335 mg; Vitamin C (3a300) 1,000 mg

##### Technological additives:

Sodium propionate (E281)

#### Analytical components

Crude protein 0.00 %; Crude oils and fats 0.00 %; Crude fibre 0.00 %; Crude ash 17.00 %; Humidity 82.00 %; Sodium 7.30 %; Potassium 3.15 %; Magnesium 0.27 %

#### Feeding recommendation

To compensate for electrolyte losses due to excessive sweating:

Large horses (600 kg body weight) 50 - 100 ml / day

Small horses 30 - 60 ml / day

Recommended feeding duration: 1 – 3 days. Offer water for ad-libitum uptake.

For stabilization of the water and electrolyte balance and when at risk of or experiencing digestive problems (diarrhea):

Foals 50 g - 100 g / day

Recommended feeding duration: 1-7 days in each case (1-3 days for sole feed).

It is recommended to consult a veterinarian before feeding the additive.

#### Storage note

Store the feed in a cool and dry place protected from direct sunlight. Use soon after opening. Store out of reach of children.

**ADMR:** ADMR compliant according to FN (version from: 29.06.21)

**Presentation:** liquid

#### Packaging

Art. ST001101 1 l dosing bottle

**Data sheet number** 4507151D
